**4 Consecutive Satisfactory Ratings
Since OCTOBER 31, 2008**

There is established in the California Vehicle Code a biennial motor carrier safety compliance inspection program to be conducted by the California Highway Patrol.

That program, known as the Biennial Inspection of Terminals (BIT) Program, requires all motor carriers operating trucks from terminals located in California to undergo an inspection of each operational terminal to rate their compliance with applicable laws and regulations relating to motor carrier safety.

This is to certify that this terminal has achieved consecutive satisfactory safety compliance ratings as indicated above. The California Highway Patrol congratulates this terminal on this meritorious achievement and recognizes the commitment to highway safety demonstrated by the personnel responsible for the operation of this terminal.
